

Wagon Wheel Tank Rings

Visit us online at www.siouxsecondarycontainment.com

- Easiest, most cost-effective method in the industry to provide appropriate tank pads and bases for **400BBL, 500BBL and 750BBL** steel and fiberglass tanks.
- **12 gauge galvanized U.S.A. steel** is highly resistant to rusting. Manufactured in South Dakota by industry leader of secondary containment products.
- **Quick field install** with unique notched assembly, quick-attach, spoke and yoke system.
- Easy to level and line up the rings in the tank battery. **Angle iron bottom spokes** will help self level the ring with a few spins or rotations in the base sand or pea rock.
- **Designed by oil industry field men** for oil field service groups. Built with common sense and safety in mind.
- Optional centering reusable disc plate for screening **pea rock and sand** into appropriate angle for concave bottom tanks.
- Standard **18" diameter center yoke** to allow for tank sumps.
- Fast delivery after placing order. Can normally be shipped most anywhere in the U.S. within 7-10 business days by calling **1-855-CONTAIN**.

DIRECTIONS:

Lay the Wagon Wheel Tank Ring down on pea rock, spin it a turn and it self-levels itself. Next drop a disc blade in the center, fill it with pea gravel and screen off the excess to give you a nice concave base for concave bottom tanks.
